BASED IN DUBAI · UAE · GCC

Everything you need. **One studio.**

A studio that designs and builds websites, apps and the systems behind them. Made for founders and growing businesses across the GCC.

01 Who we are

Design isn't just about grabbing attention. It's about holding it.

Terraflow Studio was founded in Dubai on a simple observation. Most agencies build things that look good in a presentation but don't move the needle in the market. We do it differently. Every brief is measured against one question: will this help the client grow?

01

Strategy before visuals

Most studios jump straight into visuals. We start with research. Before any design begins, we dig into strategy, competitive analysis, and audience insight, so everything we build has a solid foundation.

02

Design that performs

Everything we create ties back to a measurable outcome. Design isn't just aesthetic for us, it's expected to perform. We think in terms of your results, not just our deliverables.

03

True partnership

We're your single, trusted partner, not just another vendor. From the brand to the build to the years after launch, we're invested in where you're headed.

04

Radical transparency

We don't gatekeep our expertise. We're upfront about everything: our pricing, our process, how we work. Working with us should feel simple from day one.

02 What we do

We help brands design, build, and launch thoughtful work that is clear, scalable, and built to perform. Everything under one roof, so strategy, design and the build never fall out of sync.

01	Strategy & Brand Design	Identity systems that define how a brand looks, speaks, and holds together across every touchpoint.
02	Websites	From one-page sites to full catalogues and booking. Designed and built in-house, fast on a phone.
03	App Development	iOS and Android apps, from first prototype to the app stores, built by the team that designs them.
04	Terraflow Care	Monthly hosting, monitoring, backups and changes, so the site keeps working long after launch.
05	UX Consultancy	Clear, usable interfaces built from content, flows, and components that scale across screens and devices.
06	Office Hardware	Private file storage and on-site systems for offices, set up, backed up and run by us.

03 Signature service

TERRAFLOW CARE · MONTHLY

We build it. **Then we look after it.**

Most business websites get built once and left alone. Then a domain lapses, a plugin breaks or the site goes down, and nobody notices until a customer does. Care is the monthly plan that stops that.

- Hosting and domain renewals handled
- Backups and security updates
- WhatsApp and enquiry forms tested
- Uptime checks every five minutes, with alerts
- Monthly changes: prices, photos, new pages
- A short monthly report (uptime and what changed)

Build	Launch	Care
BRAND, SITE OR APP	LIVE AND TESTED ON PHONES	EVERY MONTH AFTER

5

Minutes between every uptime check.

If a site we look after goes down, we get an alert and start on it straight away. The business hears about it from us, not from a customer.

HOW WE WORK

Four phases. One standard.

Every engagement runs the same disciplined path, from the first brief to a live site. No hand-offs to junior teams, no black boxes, and no work that looks good but doesn't move the business.

METHOD

01

Discovery & Immersion

Brief, audit, and market landscape. We learn the business before we touch a pixel.

02

Strategy & Architecture

Positioning, messaging, and structure. The foundation every design decision hangs on.

03

Design & Development

Identity, website, and assets, designed and built to the same standard.

04

Launch & Care

Go live, then hosting, monitoring and monthly changes, so it keeps working.

KEY FIGURES

95%	Achieved defined strategic objectives
96%	Exceeded expectations on key metrics
92%	Reported measurable ROI within 12 months

"Terraflow understood exactly what we needed without us having to over-explain. The brand they built for us looks like it belongs in a completely different league to where we started."
