A somewhat creative **studio.**

We design and build websites, apps and the systems that keep them running. Based in Dubai, working across the GCC.

01 Who we are

Your website is the first meeting. Most businesses lose it **before they say a word.**

Terraflow started in Dubai because we kept finding good companies with websites that made them look smaller than they are. Slow pages. Forms nobody answers. A copyright year from 2019. We fix that, and then we stay to keep it fixed.

01

Phones first

Most of your customers meet you on a phone. We design for that screen, then the big one.

02

Prices in writing

You see the number before we start. No hourly meter running in the background.

03

One team

The people who design your site build it. No hand-off to someone you never met.

04

We stay

Every site can come with Care: hosting, monitoring and changes, every month.

02 What we do, and what it costs

01

Single-page website

One sharp scrolling page with WhatsApp, a map and your services. For shops, clinics and trades that need to look right and get the call.

FROM AED 6,000

02

Website redesign

Your site works but looks tired. We rebuild it on what you already have, so you keep your web address and the content that already works.

FROM AED 5,000

03

Complex website

Catalogues, stock listings, bookings and online orders. For dealers, suppliers and anyone with more than a page to say.

FROM AED 12,000

04

Branding and logo

A logo and identity that holds up on a shop sign, a van, an invoice and a phone screen. On its own or with any site.

FROM AED 2,500

05

App development

iOS and Android apps, designed and built by the same team, through to the App Store and Google Play.

Quoted per project

06

Terraflow Care

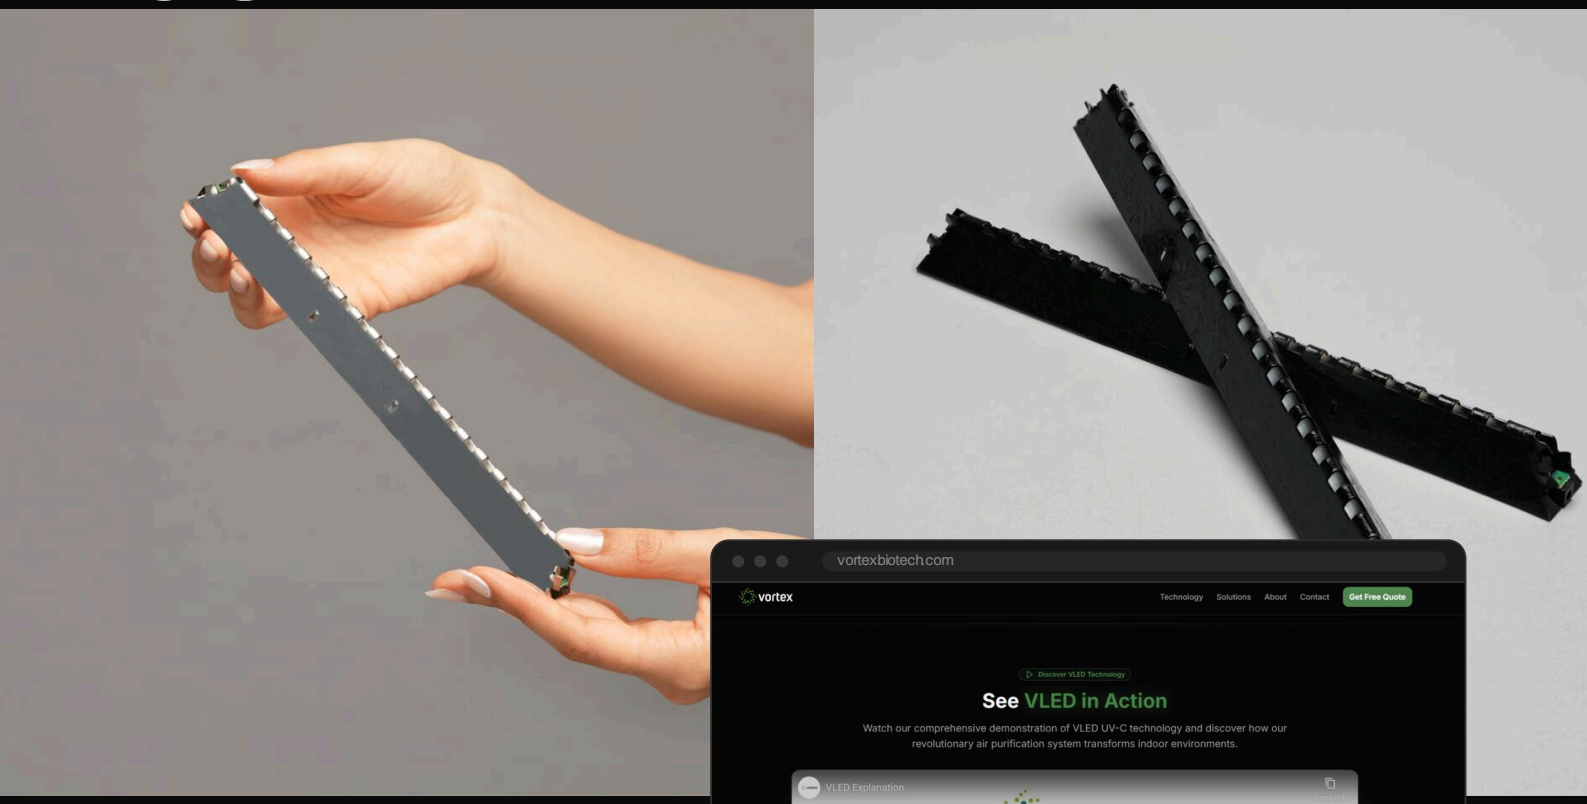

Hosting, uptime checks every five minutes, backups, security updates and your monthly changes.

Monthly plan

Also: private file storage and on-site systems for offices, set up, backed up and run by us.

Prices in UAE dirhams.

03 Selected work

Vortex Biotech

BIOTECH · DUBAI

Brand and website for a UV-C air purification product, built to explain a technical product to buyers who are not engineers.

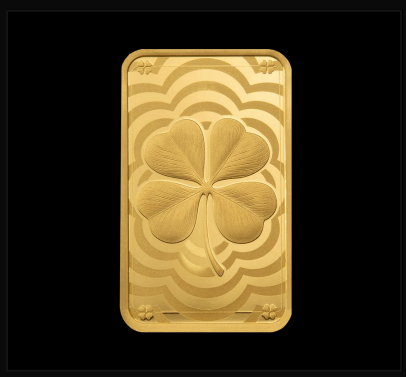

"Terraflow understood exactly what we needed without us having to over-explain. The brand they built for us looks like it belongs in a completely different league to where we started."

VORTEX BIOTECH · DUBAI

Naif Gold

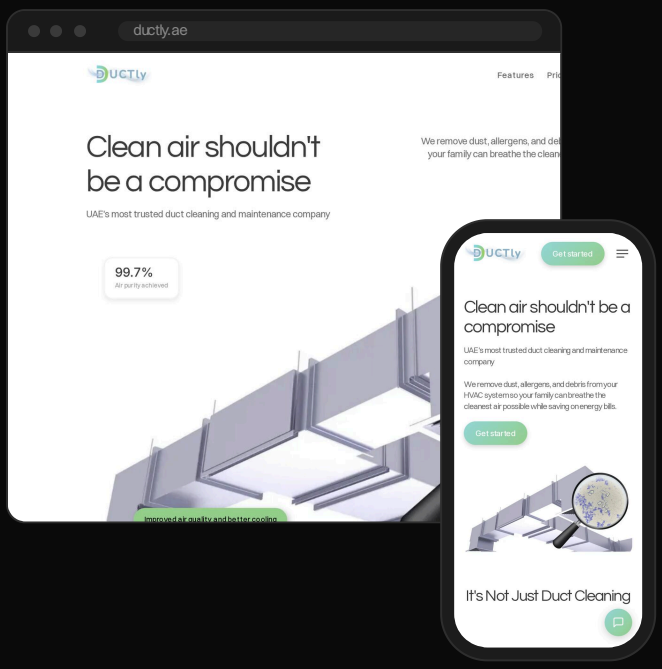

GOLD BULLION · DUBAI

Gold bar and packaging design for a full range, 1g to 100g. The clover bar is the 5g lucky charm edition.

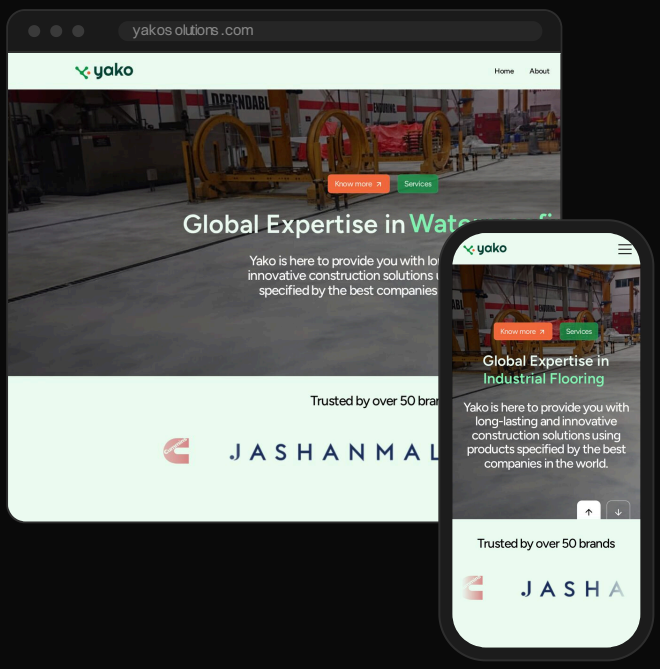

Ductly

DUCT CLEANING · UAE

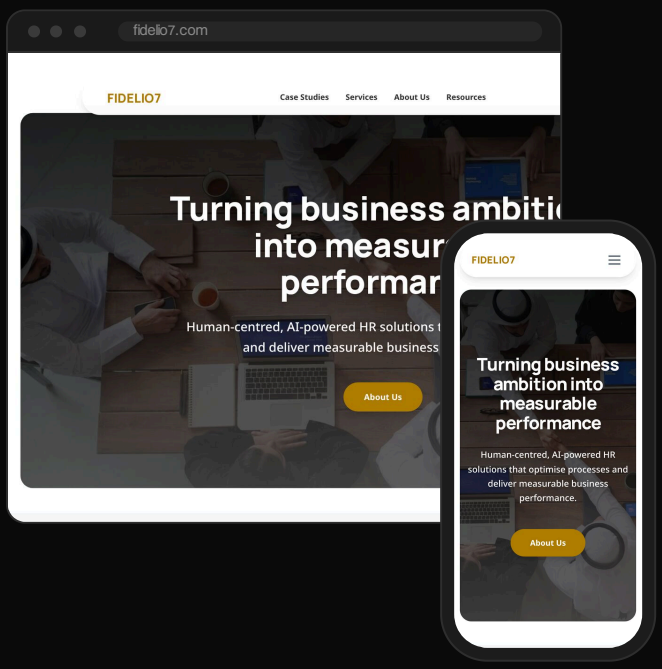

Website, plus monthly Care. Monitored every five minutes, with a downtime report each month.

Yako Solutions

WATERPROOFING · UAE

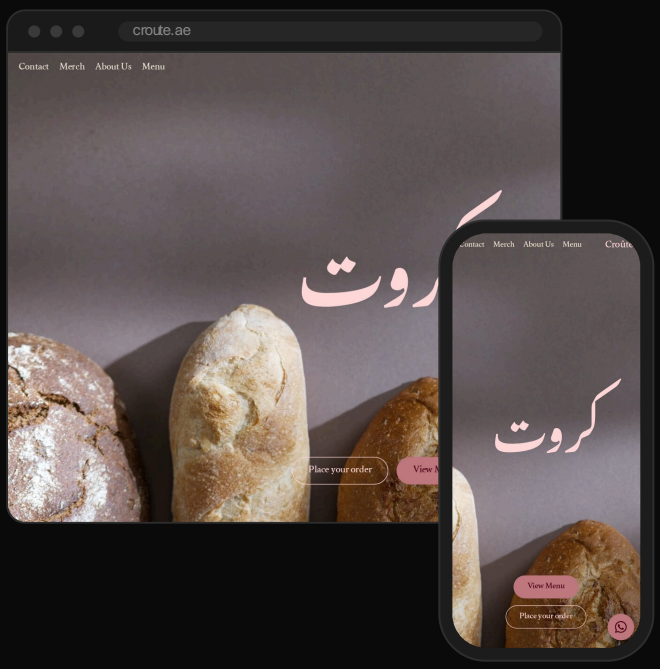

Website, hosting and monthly Care for a waterproofing and industrial flooring specialist.

Fidelio7

HR SOLUTIONS

Brand and website for an HR consultancy working with growing businesses.

Croûte

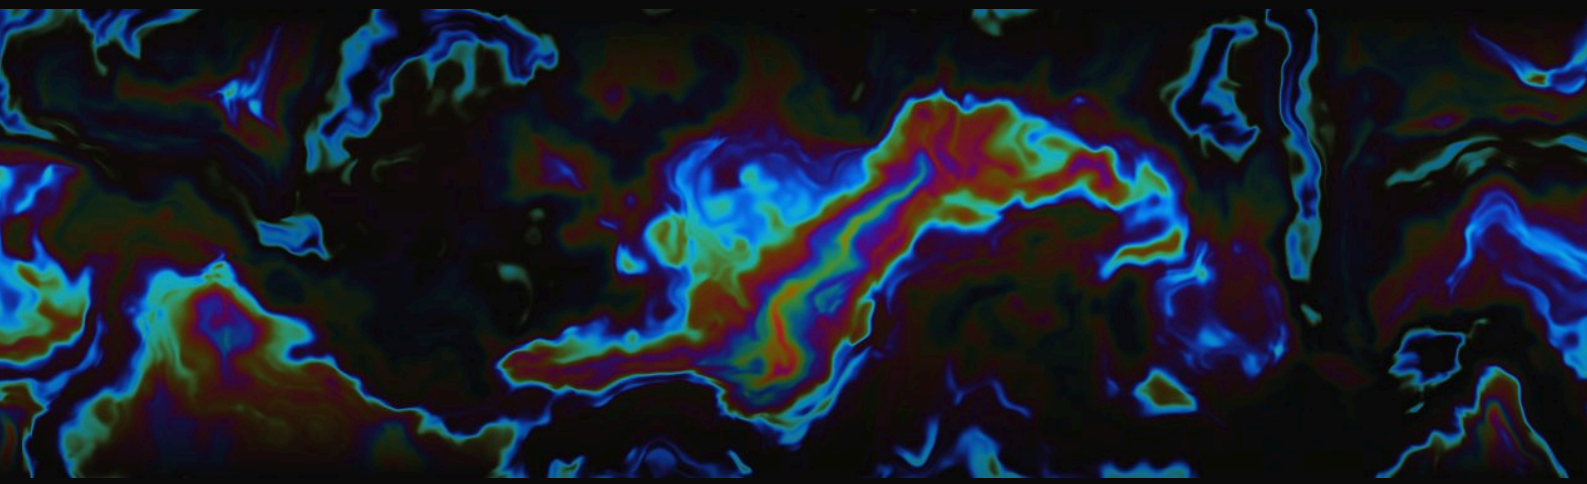

FOOD TRUCK · DUBAI

Truck branding and website for an artisan sandwich truck. Orders go straight to WhatsApp.

04 Terraflow Care

We build it.
Then we look after it.

5
MINUTES BETWEEN CHECKS

01 Hosting and domain renewals handled

02 Uptime checked every five minutes

03 Backups and security updates

04 Monthly changes: prices, photos, pages

05 WhatsApp and enquiry forms tested

06 A short report every month

Most websites get built once and left alone. Then a domain lapses or the site goes down, and the owner hears about it from a customer. With Care, you hear about it from us.

05 How we work

Four steps. The price is agreed at step two, **before anything gets built.**

01

Look

We go through your site, your listing and how customers reach you today.

02

Plan

Pages, words and a fixed price, in writing.

03

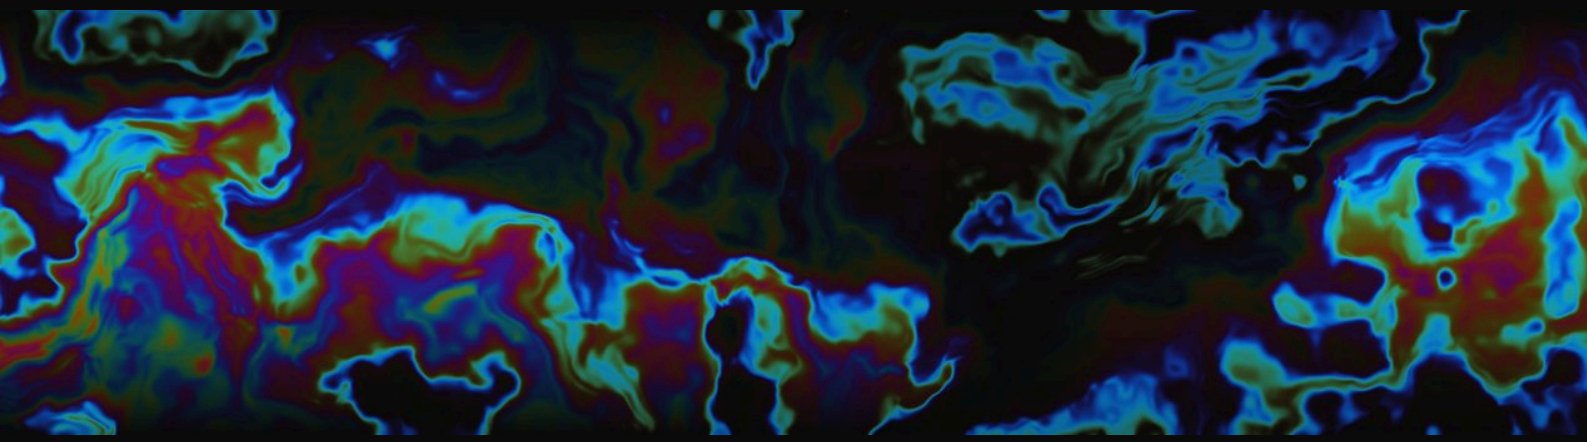

Build

Designed and built in-house, tested on real phones.

04

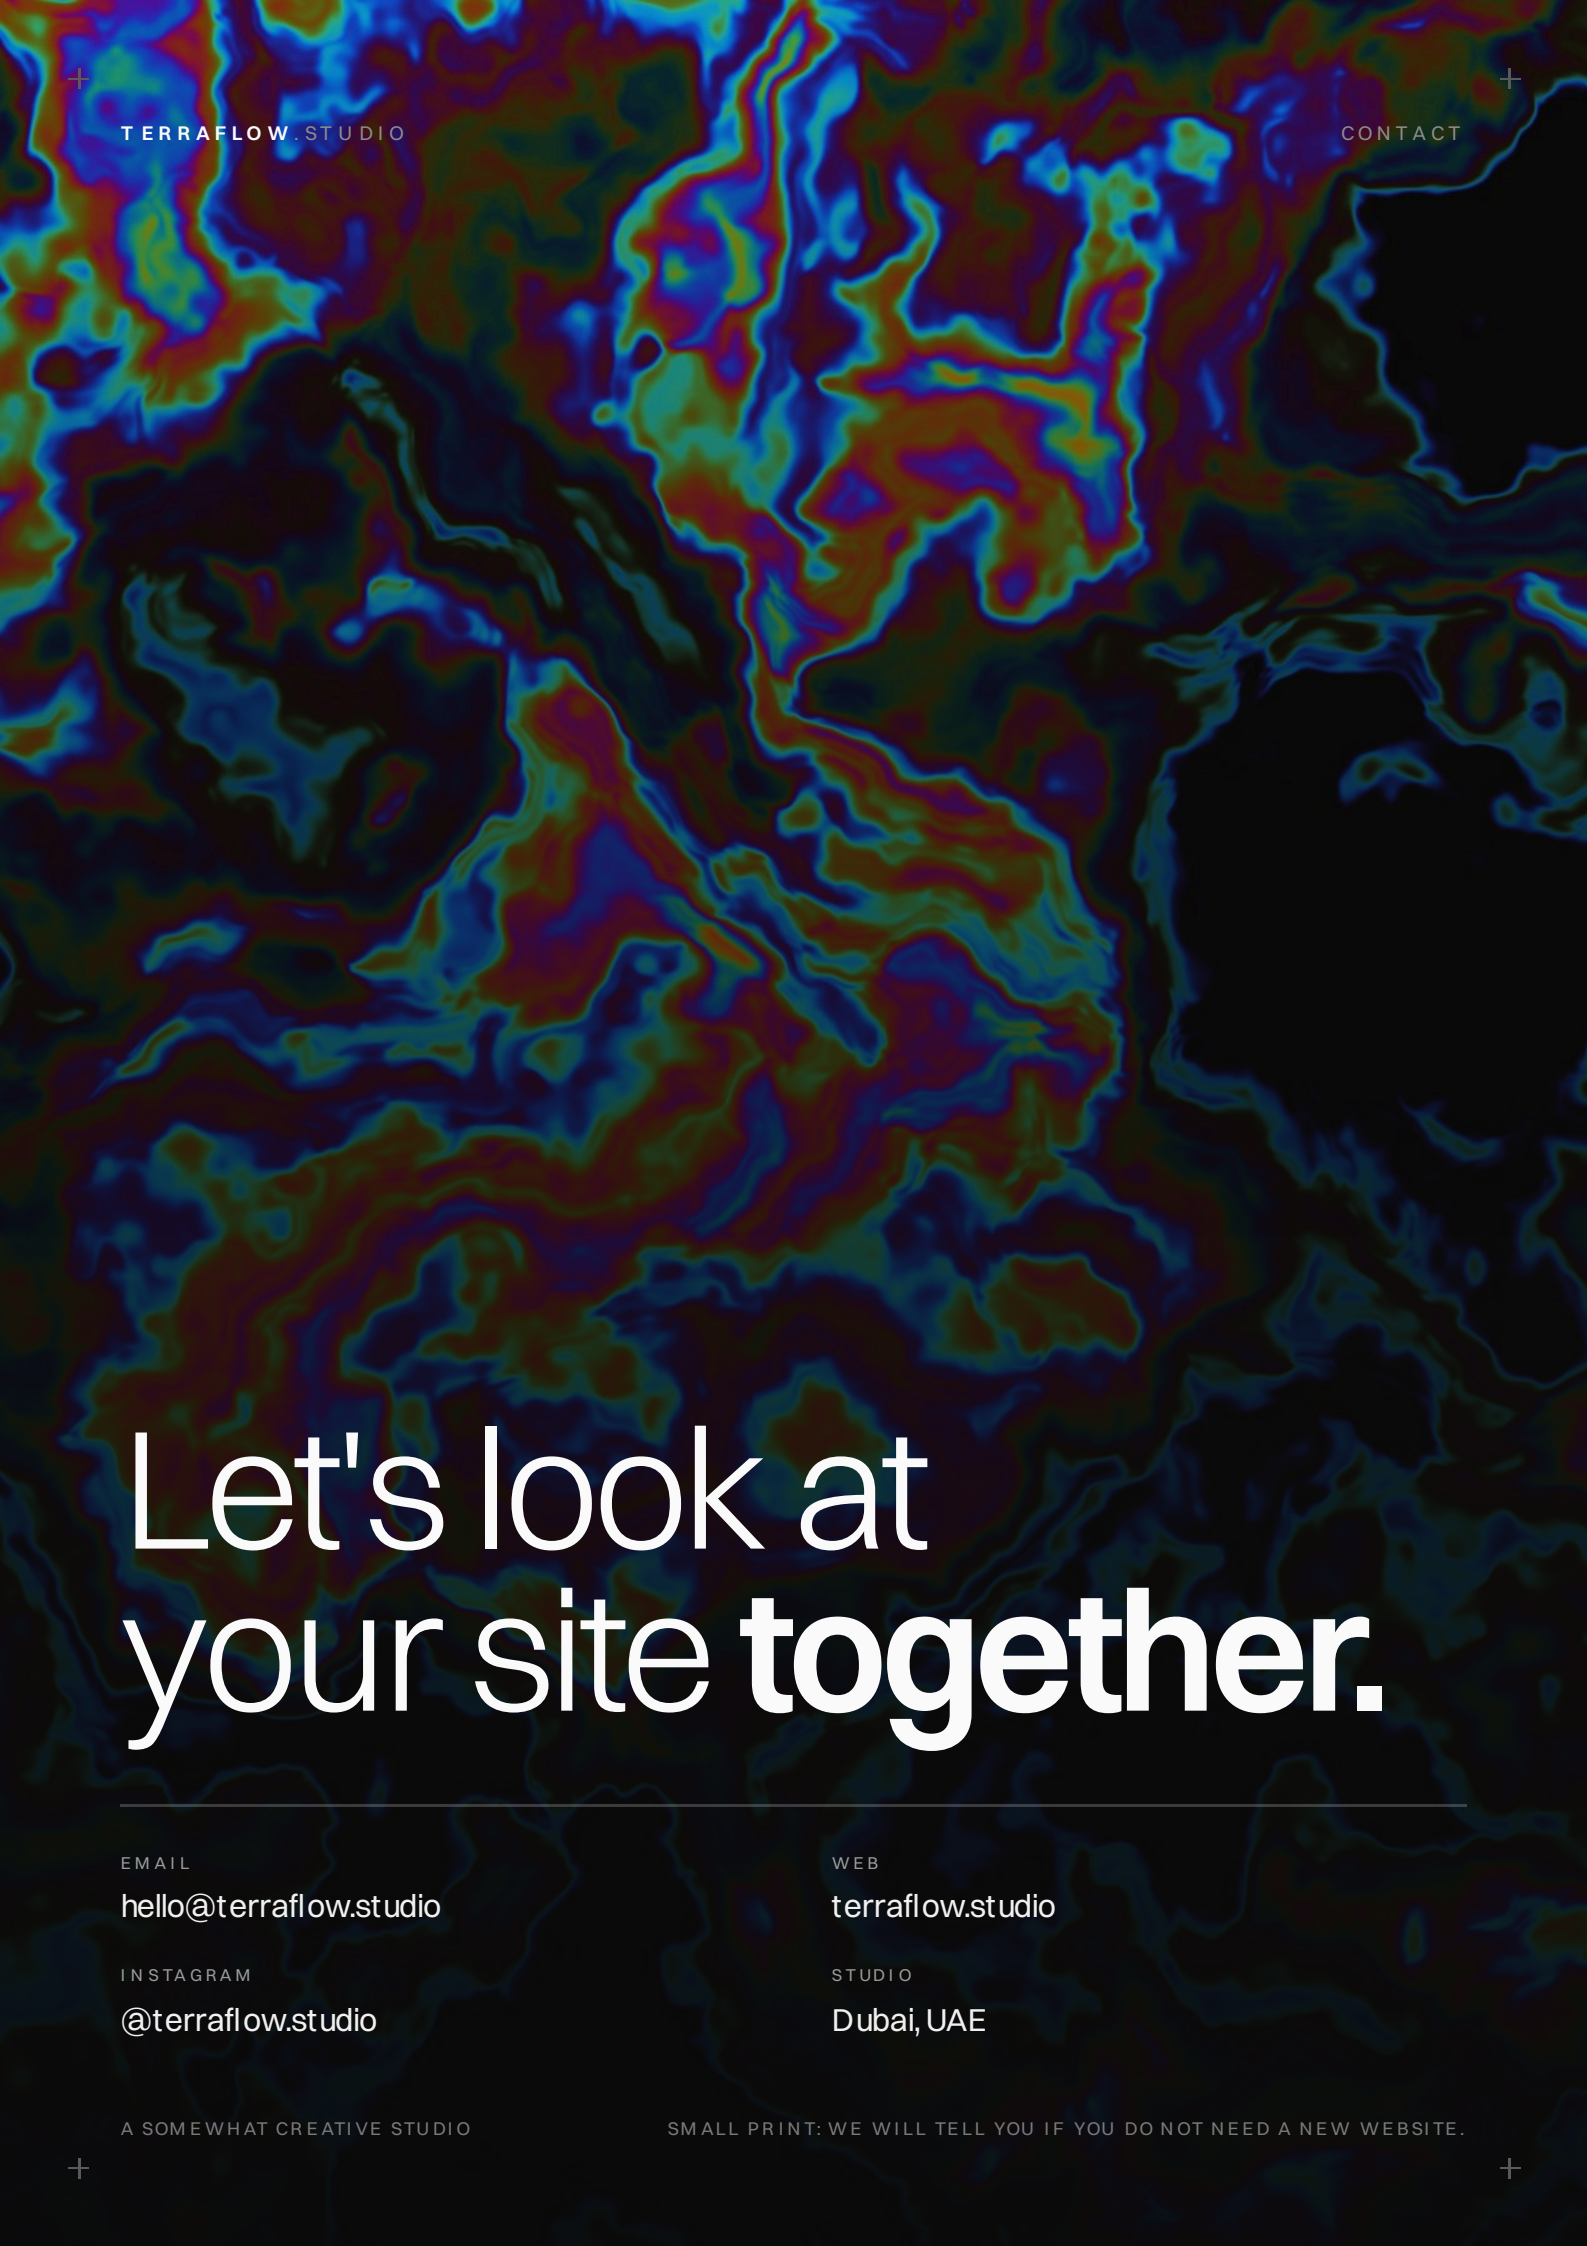

Launch

Go live, then Care keeps it running.

THE TEAM
